Redi2 Software as a Service (SaaS) Web-based Fee Billing Solutions™

Businesses excel by focusing on their expertise. For your firm, success is based on your ability to focus on growing assets under management and strengthening client relationships. For Redi2 Technologies, our success is based on our ability to deliver sophisticated yet easy-to-implement fee billing solutions.

Redi2 Technologies' Software as a Service (SaaS) web-based fee billing solutions give you the best of both worlds: you gain access to powerful fee billing solutions to build profitability while avoiding the costly and complex burden of software management.

Redi2 Technologies' web-based Software as a Service (SaaS) solutions enable your firm to minimize the costs and complications of deploying sophisticated yet simple fee billing solutions enterprise-wide.

A highly scalable and secure web-based architecture

Our flagship Redi2 Revenue Manager application and add-on modules are hosted at Redi2's robust and reliable SAS 70 Type II certified data center, backed by our commitment to provide superior performance and uptime. Reliability features include real-time data mirroring, full redundancy, geographic diversity and multi-failover for guaranteed up-time.

Our highly scalable and secure n-tier Service Oriented Architecture (SOA) delivers cost-effective connectivity to virtually unlimited web-enabled end-user desktops. All your users need is a web browser and access privileges, which you define and manage to get your users up-and-running with ease. Even with our hosted SaaS solutions, your firm gains all of the benefits of configurable rules-based functionality that lets your users specify parameters, such as e-mail distribution of invoices and report scheduling, based on the way you choose to do business.
