

## Redi2 Software as a Service [SaaS]

Businesses excel by focusing on their expertise. For your firm, success is based on the ability to deliver solid investment advice, increase assets under management and strengthen client relationships. For Redi2 Technologies, success is based on our ability to deliver sophisticated yet easy-to-implement fee billing solutions.

Redi2 Technologies' Software as a Service [SaaS]<sup>TM</sup> web-based fee billing solution offers the best of both worlds: Financial firms gain access to powerful fee billing solutions to build profitability while avoiding the costly and complex burden of software and hardware management.

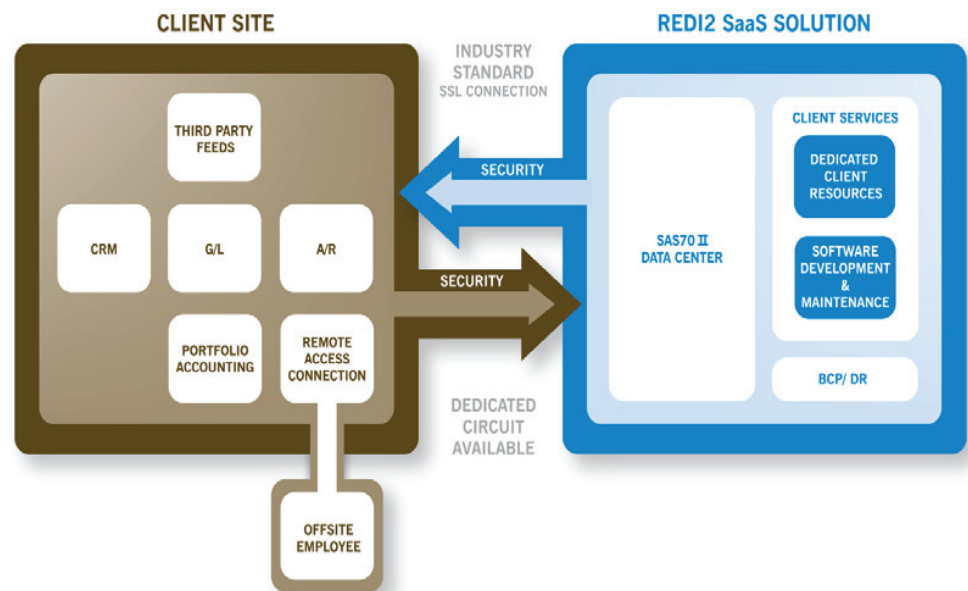

**"Revenue Manager's advanced rules-based functionalities accommodate a wide variety of fee schedules and billing formats. Redi2's ability to deliver a highly integrated solution while meeting a rigorous timeline contributed significantly to the success of this project."**

**– Jeff Nachman,  
Senior Vice President,  
Mellon Financial  
Corporation**

Redi2 Technologies' web-based Software as a Service [SaaS] solutions enable your firm to minimize the costs and complexity of deploying intuitive, best-in-class fee billing solutions enterprise-wide.

### Leave it to the Experts

Firms large and small are realizing that procuring and utilizing software the traditional way – where their internal technical team installs, maintains, updates and supports vendor software – is not the most effective or efficient.

At Redi2, we pioneered the SaaS delivery model for global financial services revenue management. As the market leader in vendor-hosted fee billing, we have helped our clients streamline the implementation process and realize significant reductions in fee billing system costs.

## A Highly Scalable and Secure Web-Based Architecture

Our flagship Revenue Manager application and add-on modules are hosted at a robust and reliable SAS 70 Type II certified data center, backed by our commitment to provide superior performance and uptime. Reliability features include real-time data mirroring, full redundancy, geographic diversity and multi-failover for guaranteed up-time.

Our highly-scalable and secure n-tier Service Oriented Architecture (SOA) delivers cost-effective connectivity to virtually unlimited web-enabled end-user desktops. Users only need a web browser and access privileges (which your firm defines and manages) to ensure staff are up-and-running with ease. With our hosted SaaS solutions, your firm gains all of the benefits of configurable rules-based functionality that lets your users specify parameters – such as e-mail distribution of invoices and report scheduling – based on the way you do business.

## Key Features and Benefits

Leverage Redi2 [SaaS] to reap the benefits of best-in-class automated enterprise fee billing at reduced costs.

- Access the power of a sophisticated fee billing solution via the Internet
- Speed the delivery of advanced fee billing support to unlimited web-based desktops
- Eliminate the complexity of software implementation and upgrade projects
- Enhance performance, scalability, and business continuity
- Save time and money with a streamlined data integration effort
- Eliminate hardware procurement and maintenance costs
- Allocate valuable IT resources to more value-adding initiatives
